

# HAVE YOU AUTOMATED INGREDIENT REPLENISHMENT AT THE STORE LEVEL?

## Automated Replenishment Service

Minimum wastage. Optimum freshness. Maximum availability. Delighted diners. The path to success at the Store level is straightforward, with the Resense Automated Replenishment Service. It balances demand forecasts with usable inventory, and stocks-in-transit, to calculate the required indent quantity at an SKU level. The platform knows just the right time to push

indents from stores, to warehouses, to vendors. It also accounts for demand patterns at each store to determine the replenishment quantities from warehouses. Freed from hours of long-winded calculations and manual ordering, Store Managers can take better care of customers. That's why, Resense is the obvious choice.

## Give your business the advantage of Resense

### 01 Automate Replenishment

No human intervention.  
Create thousands of indents - from stores to warehouse and warehouse to vendors, everyday - with our automated platform.

### 02 Automate Allocation

Never lose money.  
Our platform creates a Fill Rate of more than upto 95% at stores, reducing stock outs, and increasing Full Price sales.

### 03 Improve Freshness Levels

No waste.  
Improve freshness, reduce wastage, and increase inventory efficiency, with our AI-ML driven monitoring of usable inventory at stores.

### 04 Manage New Products

No product left out.  
That's where our attributes-based demand sensing of the new product, comes in. We also provide cannibalisation forecasts for similar SKUs in your portfolio.

### 05 Improve Service Levels

No more bitter customers.  
Increase accuracy, efficiency, and help Operations Staff achieve better service levels through our machines-based replenishment indents and allocation.

### 06 Fulfill Omni-Channels

Never lose sight of your inventory.  
Account for your inventory accurately across channels. Our platform provides multi-channel demand sensing and fulfillment models.
